

Success Story:

SAP Business One ArchiveLink for ELO at Freedom Scientific in Switzerland

Freedom Scientific Blind / Low Vision Group in St. Petersburg, Florida is the world's leading producer of electronic aides for vision impaired people. The European HQ is located in Switzerland; the European support centre is located in Hamburg, Germany.

Freedom Scientific (CH) has integrated the SAP Business One ERP solution in January 2005. ELOprofessional with Fulltext database and ELO-XC, the server based e-mail management solution, have been integrated in December 2006. As the first project step about 70,000 existing emails (the database since 2003) were automatically transferred to the new document management system. The ELO – SAP ArchiveLink for Business One went live in February 2007. During the integration all SAP documents which have been accumulated since 2005 were indexed and archived (+60,000 documents) fully automated; new documents are now processed automatically.

Through a single mouse click the user can immediately display every SAP Business One document in ELO.

Invoices, Proof of Delivery or Custom's documents are scanned, through the ArchiveLink automatically archived, directly referenced within the SAP ERP system and automatically allocated / linked to the appropriate order within SAP Business One. Emailed invoices from the mother company in Florida are automatically filtered within ELO-XC and subsequently processed through the ArchiveLink.

Workflows such as invoice approval are processed through ELO's embedded workflow tool. Freedom Scientific (CH) was able to significantly improve critical business processes through the combination of SAP's Business One ERP solution with ELOprofessional and the SAP Business One ArchiveLink for ELO.

Integrated software solutions:

- SAP Business One
- ELOprofessional
- ELOprofessional Fulltext
- ELO-XC
- ELO-Barcode
- ELO XML Importer
- SAP Business One ArchiveLink for ELO (OMNI PC)
